#### \*\* Kübler encoder type 24xx meets German Railways standard

An independent test laboratory (TTI-P-G115/96-01) approved by the German Accreditation Council (DAR) certified the compliance with the railway standard, according to EN 50121.

This means our encoder is compatible with higher electromagnetic noise standards than standard industrial encoders. You will have a higher quality encoder even in applications with higher EMC noise levels.

We will gladly send you a copy of the test report on request. When ordering an encoder to the railway standard, please ensure you state this explicitly on the order.

### Miniature Type 2400 (shaft) / 2420 (hollow shaft)

#### Dimensions shaft version:

Flange type 1 (Ø 24 mm)

Flange type 2 (Ø 30 mm)

Flange type 3 (Ø 28 mm)

#### Mounting advice:

The flanges and shafts of the encoder and drive should not both be rigidly coupled together at the same time! We recommend the use of suitable couplings (see Accessories section).
